Two apple collections worth while

We are offering these collections for the benefit of the amateur Orchardist who wants a small orchard collection of the most desirable apples.

Either one of these collections planted in the garden or on the farm will soon grow into money. All the varieties listed are the kinds that we sell the most of and the kinds we most highly recommend.

Some people would rather plant a 3-4 ft. tree than a larger size and they choose from experience for it is easier to make a 3-4 ft tree grow than a 5-6 ft.

PEONIES

Beautiful and easy to grow

Don't let another spring pass without planting a bed of Peonies. When once planted they last a life time and will stand the coldest winters without covering.

The collection described here contains the best varieties we know of both for color and large size. Plant them in one bed and they will be the sensation of the neighborhood.

Floral Treasure A very large flower of the choicest pink

Marie Lemoine Ivory white, blooming later than all others.

Grandiflora Rubra Immense full flower, late, rose red.

Achille Shell pink, fading to white blooms early.

Louis Van Houttei Very dark red, richest color of the collection.

L'Esperance A very early blooming variety of exquisitely shaded pink.

Price of entire collection

\$2.50

You will never be able to buy Peonies at these prices again. Order now.
